

I think it is absurd that the FCC will even entertain the NAB's cries. I not only CHOOSE to recieve each and every channel from Xm. I also have multiple subscriptions. And to put icing on the cake i pay TAXES on my satellite radio. I choose not to listen to free radio because commercials do not fit my lifestyle. Now some lawmakers want the FCC to limit what i pay for? Please toss the NAB's petition in the trash. If regular radio had what people wanted they wouldnt have XM would they? If the NAB is worried let them regroup and offer something i can stomach. Thank you, Michael E.Tapp
